Arnav Rajpurohit

Frontend & UI Designer · AI-Assisted Product Builder

arnavrajcodes@outlook.com • Portfolio • Website • GitHub • LinkedIn

Jodhpur, Rajasthan, India

Profile

I design websites and digital experiences, then turn them into live products with AI-assisted development. My focus is on layout, typography, UI, brand direction and the details that make a product feel good to use. I began with logos and YouTube thumbnails and now build browser tools, landing pages, games and interactive concepts.

Selected websites & digital products

Zorpt · View project — *Presentation tool*

Converts PDFs and PowerPoint files into standalone HTML presentations with navigation, swipe and fullscreen support, entirely in the browser.

Aftomi · View project — *PDF workspace*

A private, browser-based PDF tool for reusable workflows including merging, rotating, removing and rearranging pages.

Aerodhara · View project — *Brand & 3D concept*

A speculative aerospace and mobility brand featuring Trayan-X, an interactive 3D vehicle with a flight simulation.

Other work: Cotiarc (habit tracker) · OperateMaths (mathematical workspace) · ethruce (animated landing page)

Games

Aero Arcade · View project — *Web · Android · Telegram*

A retro flight- and sci-fi-themed collection of browser mini-games, also available as an Android app and Telegram Mini App. Includes Aero Legend (12 levels across 4 worlds), Contrail Curse and Void Siege.

Novels & digital publishing

Created two AI-assisted novels and published them through Libri by Arnav, a reading platform I designed for web, Android and Telegram.

The Signal Before Its Sender · 100-page AI-assisted novel about an impossible signal and the people who receive it.

The Eleventh Seam · 141-page AI-assisted thriller about a neuroscientist and a mysterious note.

Independent experience

Frontend / UI Designer & AI-Assisted Product Builder — *Jun 2026 – Present*

Independent projects · Set the visual direction and user experience of self-initiated products; use tools such as Claude and Lovable for much of the code, refine the results and publish through Cloudflare Pages and GitHub.

Logo & Thumbnail Designer — *Nov 2022 – Present*

Personal projects and friends' YouTube channels · Created logos, profile pictures, banners, channel identities and thumbnails, including for web-development tutorials.

Skills & workflow

Design Website and landing-page design; UI layout; visual identity concepts; typography; thumbnails; interactive concepts.

Build & publish Claude, Lovable, ChatGPT, Gemini; Cloudflare Pages; Git/GitHub; Capacitor; Telegram Mini Apps.

Technical learning HTML/CSS familiarity; JavaScript and programming fundamentals in progress. AI assists with much of my implementation.

Education

Sri Chaitanya Techno School, Jodhpur — *2023 – 2024*

Senior Secondary (Class XII) · Science: Mathematics, Biology and Computer Science.

Additional study: Introductory computer science (CS50, in progress); learning JavaScript.
